Brain-Based Strategies for Effective Teaching, Learning & Well-Being

About the course

Re-imagine education, with A Brain-Based Holistic Approach to Well-Being, Teaching & Learning, presented by highly-recommended educational presenters.

Education is enhanced by teachers when they have a clear understanding of how student brains work, learn, remember & grow. But, it is most effective when teachers use this knowledge with real students, in real classrooms, in their daily teaching practices.

This workshop will give you the confidence to easily plan or adapt enjoyable lessons that lead to less-stressed and better-behaved students, who are more engaged and motivated, and who learn and remember more effectively. When we as teachers use cutting-edge brain-science & psychology for teaching and learning, we improve staff & student well-being. By reducing some of the leading causes of teacher & student stress, we also dramatically improve our ability to teach effectively. This enables our students' brains to learn more successfully.

Date

Tuesday 17 January 2023

Time

9am - 4pm

Cost

Member: Full time: \$240

Member: Part time/relief/student: \$120

Non-member: \$385
