eNews - 10 February 2022

SSTUWA
State School Teachers' Union of WA

GA 2021 Update

The SSTUWA has received an offer from the Department of Education of terms for a replacement General Agreement that falls a long way short of our claims.

A full comparison of the Log of Claims, the department's offer and the union position can be found here.

Members should note that negotiations are continuing. Executive is also considering a range of possible new directives in addition to those currently in place. The current directives should continue to be enacted. Members will be informed of any progress or additional directives via Enews and social media.

COVID-19 latest

The SSTUWA continues to lobby for changes and improvements to measures to keep education staff safe during the pandemic. In particular we are asking for changes to the way COVID-19 leave is accessed. We are also seeking support for educators from parents and the community at large as schools try to implement new protocols, often on very short notice. The union has been putting this case in meetings and through the media. Our latest media release can be found here.
